FINEX P J D C Bag Filters	
	
MODELS	FDC JET/OPEN TYPE
Advantages	<p>*Very high efficiency of dust collection</p> <p>*Minimum maintenance because there are no moving parts.*Low installation cost</p> <p>*Low space requirements.*Changing of bags without entering into the dirty air chamber is possible .*</p> <p>Any bag can be removed without disturbing the others.*Constant efficiency irrespective of dust loading.*SIZES: 7 sq metre to 75 sq m</p>

FINEX ROTARY AIRLOCK VALVES	
	
MODELS	FRAV 4/6/8/12 INCH
Power	½ to 3 HP
Design	Drop through Type for direct gravity discharge of powders granules inSto collection bins receivers & Blow through type, for cohesive materials which are not easily discharged so conveying air passes through and purges the discharge pockets.
Application	Used for transfer of dry solid granular solids powders between parts of a system at equal pressure with minimum air losses in different pressure conditions.
